Article index

Number 1

Wave propagation in composite materials with fibre waviness
Shi-Chang Wooh and I.M. Daniel 3
Through-thickness characterization of solids by wideband air-coupled ultrasound
D.W. Schindel and D.A. Hutchins 11
Analysis of adaptive imaging algorithms for ultrasonic non-destructive testing
R. Kažys and L. Svilainis 19
Ultrasonic scattering models for distribution of cracks
A.S. Cheng and M.T. Resch 31
Experimental and theoretical investigation of scattering from a distribution of cracks
J. W. Littles Jr, L.J. Jacobs and J. Qu 37
Determination of elastic moduli in anisotropic media from ultrasonic contact measurements
J.A. Hood and R.B. Mignogna 45
Bistability and chaos in acoustic resonators
G.A. Lyakhov, A.K. Proskuryakov, K.F. Shipilov and O.V. Umnova 55
Acoustic and dynamic properties of two-phase media with non-spherical inclusions
J. Lewandowski 61
A novel 8-bit ultrasound phased-array controller for hyperthermia applications
A. Lovejoy, P. Pedrick, A. Doran, T.A. Delchar, J.A. Mills and A. Stamm 69
Ultrasonic studies of preserved peaches
R.C. Chivers, H. Russell and L.W. Anson 75

Number 2

A model for the ultrasonic inspection of composite plates
J.A. Ogilvy 85
Ultrasonic measurement of the thickness, phase velocity, density or attenuation of a thin-viscoelastic plate. Part I: the forward problem
V.K. Kinra and V.R. Iyer 95
Ultrasonic measurement of the thickness, phase velocity, density or attenuation of a thin-viscoelastic plate. Part II: the inverse problem
V.K. Kinra and V.R. Iyer 111
Relating acoustic emission signal parameters to the strength of fibres used in the manufacture of polymeric composites
E.U. Okoroafor and R. Hill 123
Temporal modulation of a laser source for the generation of ultrasonic waves
R. Pierce, C. Ume and J. Jarzynski 133
Development of a thermoelectric sensor for ultrasonic intensity measurement
M. Romdhane, C. Gourdon and G. Casamatta 139
Time–frequency processing of underwater echoes generated by explosive sources
G.C. Gaunaurd and H.C. Strifors 147
Non-linear ultrasonics to determine molecular properties of pure liquids
C.M. Sehgal 155
Quantitative characterization of carotid atheromatous plaques using ultrasonic rf A-scan data
K.L. Chan 163

Number 3

Material classification through neural networks
A. Roy, P. Barat and S.K. De 175
Acoustic characterization of metals with columnar grains
C.K. Jen, H. Soda, Y.S. Liu, C. Neron, A. Ohno and A. McLean 181
Investigation of block filtering and deconvolution for the improvement of lateral resolution and flaw sizing accuracy in ultrasonic testing
J. Zhao, P.A. Gaydecki and F.M. Burdekin 187
Experimental analysis of porosity-induced ultrasonic attenuation and velocity change in carbon composites
H. Jeong and D. K. Hsu 195
Numerical method to recover the elastic constants from ultrasound group velocities
M. Deschamps and C. Bescond 205
A perturbation analysis of Lamb-wave
Z. Zhu, J. Liand J. Wu 213
Local investigation of some ultrasonic devices by means of a thermal sensor
M. Romdhane, C. Gourdon and G. Casamatta 221
Maximum-entropy estimate of the orthorhombic texture from ultrasonic measurements
J. Lewandowski 229
Correlations of backscattered ultrasound from scattering suspensions in turbulent flow
T. Niederdränk 239
The application of modified forms of the Urick equation to the interpretation of ultrasound velocity in scattering systems
V.J. Pinfield, M.J.W. Povey and E. Dickinson 243
Ultrasonic micrometer with submicron precision
A. Kokubo and K. Takagi 253

Number 4

Optical detection of ultrasound on rough surfaces by a phase-conjugate method
H. Nakano, Y. Matsuda, S. Shin and S. Nagai 261
The photoacoustic effect generated by an isotropic solid sphere
M.I. Khan and G.J. Diebold 265
A numerical model of ultrasonic scattering by a defect in an immersion test
J. Zhao, P.A. Gaydecki and F.M. Burdekin 271
Acoustic effects in solids during thermoemission of fracture processes
A.G. Bratukhin and O.M. Gradov 271
Analysis of guided wave interaction with a cylindrical flaw by the method of moments
L. Singher, Y. Segal and J. Shamir 281
Acoustic method of investigating the surface potential in semiconductors. Study of the GaP:Te (110) real surface
T. Pustelny 289
Ultrasonic beam focussing in ferroelectric ceramics by application of a non-uniform electric field
V.N. Belyi, N.S. Kazak, V.K. Pavlenko, A.G. Mashchenko and F.M. Severin 295

0041-624X/95/$09.50 © 1995 - Elsevier Science B.V. All rights reserved
SSDI 0041-624X(95)00059-3

Ultrasonic approach to obtaining partial thermodynamic characteristics of solutions
D.A. Tikhonov, O.E. Kiselyov, A.P. Sarvazyan and G.N. Sarkisov 301
Ultrasonic compression wave propagation in adhesive polymers described as a signal filtering process
R.E. Challis and R.P. Cocker 311
Generation and detection of Rayleigh waves with improved attenuation using a piezo-copolymer transducer P(VDF-TrFE)
M. Dali-Ali, Ph. Benech and J.P. Perrier 321
Glass transition characterization of homogeneous and heterogeneous polymers by an ultrasonic method
N.T. Nguyen, M. Lethiecq and J.F. Gerard 323
Tissue characterization of arteries with 4 MHz ultrasound
W. Tobocman, K. Santosh, J.R. Carter and E.M. Haacke 331
The mechanism of subharmonic ultrasound modulation by forcibly oscillated bubbles
A.J. Hardwick 341

Number 5

Ultrasonic scattering and velocity methods for characterization of fibre–matrix interphases
S.I. Rokhlin, W. Huang and Y.C. Chu 351
Effect of fibre–matrix interphase on wave propagation along, and scattering from, multilayered fibres in composites. Transfer matrix approach
H. Yim and J.H. Williams, Jr 365
Database generation and parametric study for ultrasonic non-destructive characterization of a single fibre composite interphase
H. Yim and J.H. Williams, Jr 389
Multiparameter statistical determination of a single fibre interphase properties
S.A. Cimaszewski, H. Yim and J.H. Williams, Jr 403

Number 6

Hyperbolic heat equations in laser generated ultrasound models
T. Sanderson, C. Ume and J. Jarzynski 415
Hyperbolic heat conduction effects caused by temporally modulated laser pulses
T. Sanderson, C. Ume and J. Jarzynski 423
Experimental studies of directivity patterns of laser generated ultrasound in neutral glasses
Bai Yuhai, Pei Liwei, Fang Qiping, Yan Yuping and Ying Chongfu 429
Elastic wave interactions as a principle of vibration measurement
V.M. Rodyushkin 437
High precision, short range ultrasonic sensing by means of resonance mode locking
J. Tapson 441
Study on the multifrequency Langevin ultrasonic transducer
Lin Shuyu 445
Radiation of ultrasound into an anisotropic solid
Q.C. Guo and J.D. Achenbach 449
Arc arrays: studies of high resolution techniques for multibeam bathymetric applications
B. Chakraborty and H.W. Schenke 457
Ultrasonic parameters of concentric laminated uric acid stones
G. Pittomvils, J.P. Lafaut, H.Vandeursen, R. Boving, L. Baert and M. Wevers 463
A simulation algorithm for ultrasound liver backscattered signals
D. Zatari, N. Botros and F. Dunn 469

Article index

Number 1

Influence of ultrasound on the Diels–Alder cyclization reaction: synthesis of some hydroquinone derivatives and Ionapalene, an anti-psoriatic agent
T. Javed, T.J. Mason, S.S. Phull, N.R. Baker and A. Robertson S3
Use of ultrasound in microbial leaching of nickel from laterites
K.M. Swamy, L.B. Sukla, K.L. Narayana, R.N. Kar and V.V. Panchanadikar S5
Ultrasound-assisted epoxidation reaction of long-chain unsaturated fatty esters
M.S.F. Lie Ken Jie and C.K. Lam S11
Investigation of ultrasound catalyzed oxidation of arylalkanes using aqueous potassium permanganate
S.R. Soudagar and S.D. Samant S15
Quantification of cavitation intensity in fluid bulk
M.M. Chivate and A.B. Pandit S19
Ultrasonic vibrating electrode voltammetry. The electro-oxidation of chlorpromazine
N. Tatsumoto, S. Fujii and N.Kawano S27
Effect of ultrasound on the kinetics of oxidation of octan-2-ol and other secondary alcohols with sodium bromate, mediated by ruthenium tetraoxide in a biphasic system
A. Mills and C. Holland S33
Effect of ultrasound on the kinetics of reduction of hexacyanoferrate(III) by thiosulfate ions mediated by ruthenium dioxide hydrate
A. Mills, X. Li and G. Meadows S39
Power measurement in sonochemistry
Ratoarinoro, F. Contamine, A.M. Wilhelm, J. Berlan and H. Delmas S43
Semiquantitative characterization of

ultrasonic cleaner using a novel piezoelectric pressure intensity measurement probe
S.R. Soudagar and S.D. Samant S49
Effect of ultrasound on the degradation of aqueous native dextran
J.P. Lorimer, T.J. Mason, T.C. Cuthbert and E.A. Brookfield S55
Mercury-electroplated platinum electrodes and microelectrodes for sonoelectrochemistry
C.-W. Lee, R.G. Compton, J.C. Eklund and D.N. Waller S59

Number 2

The effect of high-intensity ultrasound on diesel fuels
G.J. Price and M. McCollom S67
Effect of ultrasound on molecular mobility in certain crystalline compounds
J. Homer, M.J. Howard and S.C. Gooda S71
Influence of sonication on Grignard reagent formation
A. Tuulmets, K. Kaubi and K. Heinoja S75
Some recent studies at Coventry University Sonochemistry Centre
J.P. Lorimer and T.J. Mason S79
Estimation of hydroxyl free radicals produced by ultrasound in Fricke solution used as a chemical dosimeter
A.K. Jana and S.N. Chatterjee S87
Low-MHz frequency effect on a sonochemical reaction determined by an electrical method
J. Huang, R. Feng, C. Zhu and Z. Chen S93
Electroless coating of copper on ceramic in an ultrasonic field
Y. Zhao, C. Bao, R. Feng and Z. Chen S99
Sonolysis and radiolysis of glyceraldehyde in deaerated aqueous solution
E. Fuchs and H. Heusinger S105
Observations on the role of $MgCl_2$ in the Weissler reaction
M. Gutiérrez, A. Henglein and H. Möckel S111
Chemical effects of continuous and pulsed ultrasound in aqueous solutions
A. Henglein S115
Bubble population phenomena in acoustic cavitation
T.G. Leighton S123
Cavitation mechanism of ultrasonic melt degassing
G.I. Eskin S137
Mechanochemistry and sonochemistry
V.V. Boldyrev S143
Comments on the evolving field of sonochemistry by a cavitation physicist
L.A. Crum S147
Ultrasound in synthesis: natural products and supersonic reactions?
C.M.R. Low S153

Non-destructive evaluation, Fibre interphase 389
Inverse scattering
Ultrasound imaging, High resolution, Tissue characterization, Atherosclerosis, Arteries 331
Iron carbonyl complexes
Synthesis, Electron-transfer agents S153
Isotopic solids
Photoacoustics, Lasers, Acoustic waves 265

Kinetics
Grignard reagent, Ultrasound S75
Kramers–Kronig
Fibre composites, Pore morphology, wave propagation, Attenuation slope, Velocity change 195

Lamb waves
Ultrasonic sensors, Polymers 213
Lasers
Laser modulation, Ultrasound generation, Transducers 133
Photoacoustics, Isotopic solids, Acoustic waves 265
Laser generated ultrasound
Heat equations, Modelling 415
Heat conduction, Modelling 423
Laser interferometry
Non-destructive evaluation, Ultrasonic inspection, Transmission coefficients, Differential self-consistent scheme 37
Laser modulation
Lasers, Ultrasound generation, Transducers 133
Laser ultrasonics
Phase conjugation, Rough surfaces 261
Directivity patterns, Neutral glass 429
Lateritic ore
Microbial leaching, Nickel extractions S5
Leaky-Lamb waves
Thin plates, Transfer function, Ultrasonic NDE 95, 111
Liquid–liquid heterogeneous reaction
Ultrasound-catalysed oxidation, Potassium permanganate S15
Low-MHz frequency
Electric methods, Bubble distribution, Sonic power, Sonic intensity S93

Magnesium chloride
Aqueous CCl_4 solution, Solubility and viscosity effects S111
Material classification
Neural networks, Back-wall echoes 175
Materials testing
Acoustic emission, Fibres, Composites, Fibre strength 123
Measurement
Ultrasonic waves, Parametric interaction, Dynamic deformation 437
Mechanical activation
Mechanochemistry, Sonochemistry S143
Mechanochemistry
Sonochemistry, Mechanical activation S143
Melting points
Ultrasound, NMR, Molecular mobility, Water of crystallization S71
Mercury-electroplated electrodes
Sono-voltammetry, Fluorescein S59
Metallic alloys
Acoustic characterization, Grains, Acoustic microscopy 181
Microbial leaching
Nickel extraction, Lattice ore S5
Micrometers
Ultrasonic resonance, Thickness measurements, PVDF, Aluminium cans, Invar plate 253
Mode-locked transducers
Industrial sensors, Air transducers, Subwavelength resolution 441
Modelling
laser generated ultrasound, heat equations 415
Laser generated ultrasound, Heat conduction 423
Models
Immersion tests, Ultrasonic scattering 271
Molecular mobility
Ultrasound, NMR, Melting points, Water of crystallization S71
Molecular properties
Non-linear ultrasonics, Diffusion coefficients 155
Multifrequency Langevin ultrasonic transducers
Transducers, Resonance frequency, Ultrasonic cleaning, Vibrational modes 445
Multilayered fibres
Wave dispersion, Scattering, Transfer matrix, Interphase, Composites 365
Multiple scattering
Turbulence, Correlation, Suspension 239

Neural network
Material classification, Back-wall echoes 175
Neural networks
Ultrasound, Backscattered signals, Tissue, Differentiation, Attenuation coefficients, Velocity dispersion, Scatterer spacing 469
Neutral glass
Laser ultrasonics, Directivity patterns 429
Nickel extraction
Microbial leaching, Lateritic ore S5
NMR
Ultrasound, Melting points, Molecular mobility, Water of crystallization S71
Non-destructive evaluation
Air-coupled ultrasound, Capacitance transducers 11
Ultrasonic inspection, Laser interferometry, Transmission coefficients, Differential self-consistent scheme 37
Elastic wave scattering, Fibre interphase 377
Inverse problem, Fibre interphase 389
Statistical analysis, Fibre interphase 403
Non-linear ultrasonics
Diffusion coefficients, Molecular properties 155

Oxidation
Wave attenuation, Velocity, Interphase characterization, Fibre composites, Fatigue damage 351
Secondary alcohols, Ultrasound S33

Parametric interaction
Ultrasonic waves, Measurement, Dynamic deformation 437
Particle size
Polymers, Degradation, Radicals, Diphenylpicrylhydrozyl S79
Partial thermodynamic characteristics
Velocity of ultrasound, Compressibility, Equation of state 301
Peaches
Visualization, Acoustic velocity, Acoustic attenuation 75
Phased-array controllers
Hyperthermia, Phase Quantization error 69
Phase conjugation
Laser ultrasonics, Rough surfaces 261
Phase quantization error
Phased-array controllers, Hyperthermia 69
Photoacoustics
Isotopic solids, Lasers, Acoustic waves 265
Physical modelling
Anisotropy, Elastic constants, Fractures/cracks 45
Rayleigh waves
Surface cracks, Reflection coefficients 31
Piezoelectric polymers
Rayleigh waves, Duraluminium 321
Polycrystalline aggregates
Entropy, Ultrasonic velocities, Textures 229
Polymers
Lamb waves, Ultrasonic sensors 213
Degradation, Particle size, Radicals, Diphenylpicrylhydrozyl S79
Pores
Porous composites, Inclusion shapes, Sintered copper powder 61

Pore morphology
Carbon fibre composites, Wave propagation, Kramers–Kronig relations, Attenuation slope, Velocity change 195
Porous composites
Inclusion shapes, Pores, Sintered copper powder 61
Potassium permanganate
Ultrasound-catalysed oxidation, Liquid–liquid heterogeneous reaction S15
Pressure sensor
Sonochemistry, Ultrasound pressure intensity profile S49
PVDF
Ultrasonic resonance, Micrometers, Thickness measurements, Aluminium cans, Invar plate 253
Pyrolysis
Radical reactions, Supercritical water, Cavitation nuclei S115

Radical reactions
Pyrolysis, Supercritical water, Cavitation nuclei S115
Radicals
Polymers, Degradation, Particle size, Diphenylpicrylhydrazyl S79
Radiolysis
Glyceraldehyde, Sonolysis S105
Rayleigh waves
Piezoelectric polymers, Duraluminium 321
Redox catalysis
Ultrasound, Reduction, Hexacyanoferrate(III), Thiosulfate, Ruthenium dioxide hydrate S39
Reduction
Redox catalysis, Ultrasound, Hexacyanoferrate(III). Thiosulfate, Ruthenium dioxide hydrate S39
Reflection coefficients
Rayleigh waves, Surface cracks 31
Resonance frequency
Transducers, Multifrequency Langevin ultrasonic transducers, Ultrasonic cleaning, Vibrational modes 445
Rough surfaces
Laser ultrasonics, Phase conjugation 261
Ruthenium dioxide hydrate
Redox catalysis, Ultrasound, Reduction, Hexacyanoferrate(III), Thiosulfate S39

Scatterer spacing
Ultrasound, Backscattered signals, Tissue, Differentiation, Attenuation coefficients, Velocity dispersion, Neural networks 469
Scattering
Urick equation, Crystallization 243
Wave dispersion, Multilayered fibres, Transfer matrix, Interphase, Composites 365
Scattering of waves
Acoustic echoes, Submerged elastic shells, Signal processing, Wigner distribution, Underwater explosions 147
Secondary alcohols
Oxidation, Ultrasound S33
Sediment formation
Diesel fuels, Alkane sonochemistry, High-intensity ultrasounds S67
Semiconductors
Ultrasonic inspection, Surface potential, GaP:Te crystals 289
Signal processing
Ultrasonic NDT, Ultrasonic imaging, Dynamic range, Signal sampling, Adaptive imaging 19
Acoustic echoes, Submerged elastic shells Scattering of waves, Wigner distribution, Underwater explosions 147
Signal sampling
Ultrasonic NDT, Ultrasonic imaging, Dynamic range, Signal processing, Adaptive imaging 19
Sintered copper powder
Porous composites, Inclusion shapes, Pores 61
Solubility and viscosity effects
Aqueous CCl_4 solution, Magnesium chloride S111
Sonic intensity
Low-MHz frequency, Electric method, Bubble distribution, Sonic power
Sonic power
Low-MHz frequency, Electric method, Bubble distribution, Sonic Intensity S93
Sonochemistry
Cavitation, Ultrasound intensity, Ultrasound power S43
Ultrasound pressure intensity profile, Pressure sensors S49
Cavitation, Bubble dynamics S147
Mechancchemistry, Mechanical activation S143
Sonochemical reaction
Acoustic cavitation, Ultrasonic horn S19
Sonolysis
Glyceraldehyde, Radiolysis S105
Sono-voltammetry
Mercury-electroplated electrodes, Fluorescein S59
Sound velocity
Uric acid stones, Acoustic impedance, Stone fragility, Internal stone structure 463
Spectra
Fracture mechanism, Heat release, Elastic waves, Fluctuation, Correlation function, Dispersion relation 277
Statistical analysis
Non-destructive evaluation, Fibre interphase 403
Statistical parameters
A-scan analysis, Carotid plaque, Direct waveform analysis, Texture analysis 163
Stone fragility
Sound velocity, Uric acid stones, Acoustic impedance, Internal stone structure 463
Subharmonic modulation mechanism
Bubbles, Surface waves 341
Submerged elastic shells
Acoustic echoes, Scattering of waves, Signal processing, Wigner distribution, Underwater explosions 147
Subwavelength resolution
Industrial sensors, Air transducers, Mode-locked transducers 441
Supercritical water
Pyrolysis, Radical reactions, Cavitation nuclei S115
Surface cracks
Rayleigh waves, Reflection coefficients 31
Surface potential
Semiconductors, Ultrasonic inspection, GaP:Te crystals 289
Surface waves
Bubbles, Subharmonic modulation mechanism 341
Suspension
Multiple scattering, Turbulence, Correlation 239
Synthesis
Electron-transfer agents, Iron carbonyl complexes S153

Testing
Flaw sizing, Block filtering, Deconvolution
Texture
Entropy, Ultrasonic velocities, Polycrystalline aggregates 229
Texture analysis
A-scan analysis, Carotid plaque, Direct waveform analysis, Statistical parameters 163
Thermal nonlinearity
Acoustic bistability, Auto-oscillations, Doubling-period bifurcation 55
Thermoelectric probes
Ultrasonic reactors, Ultrasound intensity, Heat transfer 139
Ultrasonic power, Cavitation, Ultrasonic cleaners, Reactors 221
Thin plates
Transfer function, Leaky-Lamb waves, Ultrasonic NDE 95, 111
Thiosulfate
Redox catalysis, Ultrasound, Reduction, Hexacyanoferrate(III), Ruthenium dioxide hydrate S39
Time–temperature superposition
Glass transition, Epoxy resin, Fillers 323
Tissue
Ultrasound, Backscattered signals, Differentiation, Attenuation coefficients, Velocity dispersion, Scatterer spacing, Neural networks 469
Tissue characterization
Ultrashound imaging, High resolution, Atherosclerosis, Inverse scattering, Arteries 331
Transducers
Lasers, Laser modulation, Ultrasound generation 133
Multifrequency Langevin ultrasonic transducers, Resonance frequency, Ultrasonic cleaning, Vibrational modes 445
Transfer function
Thin plates, Leak-Lamb waves, Ultrasonic NDE 95,111
Transfer matrix
Wave dispersion, Scattering, Multilayered fibres, Interphase, Composites 365
Transmission coefficients
Non-destructive evaluation, Ultrasonic inspection, Laser interferometry, Differential self-consistent scheme 37
Turbulence
Multiple scattering, Correlation, Suspension 239

Ultrasonic beams
Electroacoustic lenses, Focussing, Electric fields 295
Ultrasonic cleaners
Ultrasonic power, Cavitation, Thermoelectric probes, Reactors 221
Ultrasonic cleaning
Transducers, Multifrequency Langevin ultrasonic transducers, Resonance frequency, Vibrational modes 445

Ultrasonic degassing
Acoustic cavitation, Cavitation and degassing nuclei S137
Ultrasonic horn
Acoustic cavitation, Sonochemical reaction S19
Ultrasonic imaging
Ultrasonic NDT, Dynamic range, Signal processing, Signal sampling, Adaptive imaging 19
Ultrasonic inspection
Non-destructive evaluation, laser interferometry, Transmission coefficients, Differential self-consistent scheme 37
Composites, Elastic waves, Composite plates 85
Semiconductors, Surface potential, GaP:Te crystals 289
Ultrasonic NDE
Thin plates, Transfer funnction, Leaky-Lamb waves 95, 111
Ultrasonic NDT
Ultrasonic imaging, Dynamic range, Signal processing, Signal sampling, Adaptive imaging 19
Ultrasonic power
Cavitation, Thermoelectric probes, Ultrasonic cleaners, Reactors 221
Ultrasonic ray tracing
Composite materials, Fibre waviness, Anisotropy, Wave velocity 3
Ultrasonic reactors
Thermoelectric probes, Ultrasound intensity, Heat transfer 139
Ultrasonic resonance
Micrometers, Thickness measurements, PVDF, Aluminium cans, Invar plate 253
Ultrasonic scattering
Models, Immersion tests 271
Ultrasonic sensors
Lamb waves, Polymers 213
Ultrasonic velocities
Entropy, Polycrystalline aggregates, Texture 229
Ultrasonic vibrating electrode
Chlorpromazine electro-oxidation, Voltammetry S27
Ultrasonic waves
Elastic constants, Group velocities, Composites 205
Parametric interaction, Measurement, Dynamic deformation 437
Ultrasound
Diels–Alder cyclization reaction, Hydroquinone derivatives S3
Oxidation, Secondary alcohols S33
Aqueous native dextran, Degradation S55
NMR, Melting points, Molecular mobility, Water of crystallization S71
Grignard reagent, Kinetics S75
Fricke dosimetry, Hydroxyl free radicals S87
backscattered signals, Tissue, Differentiation, Attenuation coefficients, Velocity dispersion, Scatterer spacing, Neural networks 469
Electroless plating, Ceramic S99
Ultrasound-catalysed oxidation
Liquid–liquid heterogeneous reaction, Potassium permanganate S15
Ultrasound generation
Lasers, Laser modulation, Transducers 133
Ultrasound imaging
High resolution, Tissue characterization, Atherosclerosis, Inverse scattering, Arteries 331
Ultrasound intensity
Thermoelectric probes, Ultrasonic reactors, Heat transfer 139
Cavitation, Ultrasound power, Sonochemistry S43
Ultrasound power
Cavitation, Ultrasound intensity, Sonochemistry S43
Ultrasound pressure intensity profile
Sonochemistry, Pressure sensor S49
Underwater applications
Arc arrays, Bathymetry 457
Underwater explosions
Acoustic echoes, Submerged elastic shells, Scattering of Waves, Signal processing, Wigner distribution 147
Unsaturated fatty esters
Epoxidation, Water S11
Urick equation
Scattering, Crystallization 243
Uric acid stones
Sound velocity, Acoustic impedance, Stone fragility, Internal stone structure 463

Velocity
Wave attenuation, Interphase characterization, Fibre–composites, Oxidation, Fatigue damage 351
Velocity change
Carbon fibre composites, Pore morphology, Wave propagation, Kramers–Kronig relations, Attenuation slope 195
Velocity dispersion
Ultrasound, Backscattered signals, Tissue, Differentiation, Attenuation coefficients, Scatterer spacing, Neural networks 469
Velocity of ultrasound
Compressibility, Equation of state, Partial thermodynamic characteristics 301
Vibrational modes
Transducers, Multifrequency Langevin ultrasonic transducers, Resonance frequency, Ultrasonic cleaning 445
Visualization
Peaches, Acoustic velocity, Acoustic attenuation 75
Voltammetry
Ultrasonic vibrating electrode, Chlorpromazine electro-oxidation S27

Water
Epoxidation, Unsaturated fatty esters S11
Water of crystallization
Ultrasound, NMR, Melting points, molecular mobility S71
Wave attenuation
Velocity, Interphase characterization, Fibre composites, Oxidation, Fatigue damage 351
Wave dispersion
Scattering, multilayered fibres, Transfer matrix, Interphase, Composites 365
Wave propagation
Carbon fibre composites, Pore morphology, Kramers–Kronig relations, Attenutation slope, Velocity change 195
Wave velocity
Composite materials, Fibre waviness, Anisotropy, Ultrasonic ray tracing 3
Waveguides
Diffraction 281
Wigner distribution
Acoustic echoes, Submerged elastic shells, Scattering of waves, Signal processing, Underwater explosions 147
